

6

Number of drugs approved by the FDA to treat childhood cancers in the last 40 years.

The Children's Cancer Therapy Development Institute

is a non-profit biotech lab created with one aim:

Make childhood cancer *universally survivable*

Let's do better.

In the first 39 months of operations, cc-TDI has delivered **2** drugs into **3** clinical trials.

Childhood Cancer Facts

1 in 285 children in the US will be diagnosed with cancer by the time they are 20.

700 children are diagnosed with cancer every day. That's **1 child every 2 minutes**.

1 in 5 children diagnosed with cancer in the U.S. will not survive.

Our team, led by Dr. Charles Keller, is made up of **half scientists** and **half engineers**, collaborating to quickly discover new treatment options for children with cancer.

It's time we increase the treatment options for children with cancer.

Let's Do Better.

Get in touch and get involved.
